2/26/24 : Test and Check errors
2/28/24: Finalize

Project Goal

The goal for this project is to have a user interact within an image. The image consist of a phsical interaction with key commands and audio commands. This goal will be achieved through common use of media.

Target User

The target user is for someone that enjoys dream like states and emersing within older media more specifically music. It will aslo be for users that like to complete challenges to reach a goal.

George

Profile

George is 26 years old and currently exploring a new job in web development. On their free time they enjoy researching, listening to music, and being immersed in media. They live in San Francisco wich they think is great place for work both in inspiration and weather demanding one to work more indoors. They have a love for sleep and want to show the world this state.
